

Grass Seed Mixes and Information

RIVENDELL'S BLUEGRASS BLEND

Rivendell's 2010 sod mix—an elite bluegrass blend. Excellent for establishing new lawns or reseeding existing lawns originally established by sod. Drought tolerant, winter hardy and disease resistant. *Seeding Rate: 4-5 Lbs. per 1,000 FT²*

20%	Nudestiny
20%	Moonshadow
20%	Avalanche
20%	SR2284
20%	Award

BLUE CARPET BLEND

An elite blend of Kentucky bluegrass. Excellent for establishing new lawns or reseeding existing lawns. Winter hardy and disease resistant. *Seeding Rate: 4-5 Lbs. Per 1000 FT²*

25%	Odyssey Kentucky Bluegrass
25%	MoonShadow Kentucky Bluegrass
20%	Arcadia Kentucky Bluegrass
20%	America Kentucky Bluegrass
10%	Cheetah Kentucky Bluegrass

SPORTS PARK OS MIX

Ideal for seeding or renovating football, soccer, baseball fields and playgrounds. This mix was developed to provide durable, high quality turf on high traffic areas. It is excellent for golf course tees, fairways, and cart paths. *Seeding Rate: 4 Lbs. per 1,000 FT²*

25%	SR2100 Kentucky Bluegrass
25%	Odyssey Kentucky Bluegrass
25%	SR4600 Perennial Ryegrass
25%	Manhattan 5 Perennial Ryegrass

CAREFREE MIX

Known for surviving under extreme conditions, fine fescues can be found thriving in infertile, dry soils, deep shade, and where turf is neglected, tortured and forgotten. It is perfect for area where water and fertilizer conservation is important. *Seeding Rate: 4-5 Lbs. per 1,000 FT²*

25%	Rhino Hard Fescue
20%	SR5130 Chewings Fescue
20%	SR5250 Creeping Red Fescue
15%	Jamestown IV Chewings Fescue
10%	SR3210 Blue Fescue
10%	Dawson Creeping Red Fescue

GREEN RESISTOR BLEND

It is highly stress tolerant and exhibits good disease and pest resistance, surviving on many types of soil in full sun or light shade. Requires minimal care. *Seeding Rate: 6-8 Lbs. Per 1,000 FT²*

34%	Grande II Tall Fescue
33%	Guardian 21 Tall Fescue
33%	SR8650 Tall Fescue

RIVENDELL'S NATIVE LOW GROW MIX

Attractive species with a lower growing habit. Tough, drought tolerant mix preferred by landscape architects and designers. *Seeding Rate: ½ Lbs. per 1,000FT²*

25%	Blue Grama
20%	Blue Fescue
15%	Idaho Fescue
10%	Arizona Fescue
10%	Alpine Bluegrass
10%	Indian Ricegrass
5%	Sandberg Blue
2½%	Bottlebrush Squirreltail
2½%	Prairie Junegrass

RIVENDELL'S MOUNTAIN PASTURE MIX

Highly palatable forage grasses selected to adapt across a wide range of mountain environments. Dryland or irrigated this mix produces attractive, quality hay.

Seeding Rate: 25-35 Lbs per Acre

20%	Orchardgrass, Late Maturing
20%	Smooth Bromegrass, Lincoln
20%	Slender Wheatgrass
15%	Meadow Brome, Fleet
15%	Perennial Ryegrass, VNS
10%	Timothy, Climax

SHADY PLACE MIX

The ultimate choice for light to dense shade, Shady Place not only grows vigorously in shade, but also adapts to a wide variety of soil types and moisture conditions. *Seeding Rate: 4-5 Lbs. Per 1,000 FT²*

20%	SR5130 Chewings Fescue
20%	SR5250 Cr. Red Fescue
20%	Rhino Hard Fescue
20%	American Kentucky Bluegrass
10%	Dawson Creeping Red Fescue
10%	SR4600 Perennial Ryegrass

TUFF STUFF MIX

This mixture of tough vigorous varieties easily withstands the abuse of continual use. The durable carpet of green stands up to summer stress and requires minimal upkeep. *Seeding Rate: 5-6 Lbs. per 1,000 FT*

30%	Grande II Tall Fescue
30%	SR8650 Tall Fescue
30%	Guardian 21 Tall Fescue
10%	Ulysses Kentucky Bluegrass

Grass Seed Mixes and Information

ROCKY MOUNTAIN NATIVE MIX

This mixture was developed for the Rocky Mountain Region. It consists of native grasses that include both cool and warm season species. Provides great cold and drought tolerance for the extremes of this region.

Seeding Rate: 1/2 Lb. per 1,000 FT²

- 25% Slender Wheat Grass
- 20% Bromar Mountain Brome
- 20% Native Blue Grama
- 15 Idaho Fescue
- 10% Texoka Buffalograss
- 5% Lodorm Green Needlegrass
- 5% Rimrock Indian Ricegrass

PITKIN COUNTY MIX

A grass mix for dry conditions, as specified for many Pitkin County reclamation projects. Very drought and cold tolerant. *Seeding Rate: 1/2-1 Lb per 1,000 FT²*

- 25% Slender Wheatgrass
- 20% Mountain Brome
- 20% Western Wheatgrass
- 20% Secar Bluebunch
- 5% Thickspike Wheatgrass
- 5% Idaho Fescue
- 3% Green Needle
- 2% Indian Ricegrass

LOW GROW MIX

A mixture of low growing (8-12 inches) grasses that is drought tolerant. Suitable for areas where mowing is difficult or not desirable. It is very compatible with wildflowers. *Seeding Rate: Dryland 1/2 Lb per 1,000 FT² Irrigated 1 Lb Per 1,000 FT²*

- 30% Ephraim Crested Wheatgrass
- 25% Sheeps Fescue
- 20% Vibrant Perennial Ryegrass
- 15% Chewings Fescue
- 10% Canada Bluegrass

FOOTHILLS MIX

A mixture developed for elevations of 3,000- to 8,000 feet to provide natural cover under dryland conditions. Contains both cool and warm season grasses adapted to the Western Great Plains and Southwest regions. Has excellent cold and drought tolerance. Good for soil stabilization on poor soils.

Seeding Rate: 1/2 Lb. per 1,000 FT²

- 20% Gulf Annual Ryegrass
- 15% Revenue Slender Wheatgrass
- 10% Mountain Brome
- 10% Pubescent Wheatgrass
- 10% Hard Fescue
- 10% Canada Bluegrass
- 8% Cheyenne Indiangrass
- 7% Big Bluestem
- 5% Switchgrass
- 5% Native Blue Grama

MOUNTAIN MIX

A mixture of grasses adapted to higher elevations. Very good for mountain pastures and meadows as well as soil stabilization for ski slopes and construction sites. *Seeding Rate: 1 Lb. per 1,000 FT²*

- 20% Winter Rye
- 20% Tetraploid Perennial Ryegrass
- 15% Kentucky Bluegrass
- 15% Garnet Mountain Brome
- 15% Paiute Orchardgrass
- 10% Climax Timothy
- 5% Alsike Clover, VNS

DRYLAND PASTURE MIX

A mixture of hardy, drought tolerant grasses adapted to the Northern Great Plains and Intermountain regions. It provides good, palatable spring forage and fair re-growth in the fall. Widely adapted to many soil types and elevations of 3,000 to 10,000 feet. Ideal for areas not receiving regular irrigation. *Seeding Rate: 1/2 Lb per 1,000 FT² or 25Lb per Acre.*

- 20% Lincoln Smooth Brome
- 20% Oahe Intermediate Wheatgrass
- 15% Dahurian Wildrye, VNS
- 15% Paiute Orchardgrass
- 10% Verano Tetraploid Perennial Rye
- 10% Revenue Slender Wheatgrass
- 10% Hycrest Crested Wheatgrass

PREMIUM IRRIGATED PASTURE MIX

This pasture mix is a formulation of high quality, high producing and palatable grasses to be used for grazing and or hay production. This combination is designed with cool season grasses that produce well in the Intermountain area as well as the High Plains of the Rocky Mountain Region. A grower can use this mix for intensive grazing for the production of high quality forage. *Seeding Rate: 1/2 to 1 Lb per 1000 FT²*

- 25% Fleet Meadow Brome
- 25% Verano Tetraploid Perennial Rye
- 20% Potomac Orchardgrass
- 15% Crown Royale Orchardgrass
- 15% Smooth Brome

***Grass mix varieties subject to change throughout the year due to changes in market conditions.**
